The screenshot shows the IBM Watson Assistant Lite interface. The left sidebar includes sections for Intents, Entities (which is currently selected), System Entities, Dialog, Options, Webhooks, Disambiguation, Autocorrection, Algorithm Version, Upload / Download, and Content Catalog. The main content area displays a table of entities under the 'My Entities' tab. The table has columns for Entity, Values, and Modified. The entities listed are: @author (values: J.K. Rowling, Margaret Atwood, Paulo Coelho, Haruki Murakami, Jane Austen, George R.R. Martin, Dan Brown, Agatha Christie, Stephen King; modified: 4 days ago); @genre (values: nonfiction, horror, historical fiction, fantasy, science fiction, mystery, romance, thriller, biography; modified: 4 days ago); @length (values: short, long, medium; modified: 4 days ago); @mood (values: dark, funny, sad, adventurous, romantic, uplifting; modified: 4 days ago); and @Popular_books (values: Popular Books; modified: 3 days ago). A 'Create entity' button is located at the top right of the table. The bottom of the page shows navigation links for 'News for you', 'Mahindra-SML d...', and a footer with system icons and the date/time '03-08-2025 11:28 AM'.

Text

Great! I'd love to help you find a book that suits your taste.

Could you share a bit about what you're into?
Are you drawn to a particular genre like mystery, romance, fantasy, or sci-fi?
Or maybe you have a favorite author whose style you enjoy?

You can even tell me how you're feeling today — whether you're in the mood for something uplifting, intense, thought-provoking, or just a light and cozy read.

The more you share, the better I can match you with a book you'll love!

The screenshot shows the IBM Watson Assistant dialog builder interface. On the left, a sidebar lists various categories: Intents, Entities, My Entities, System Entities, Dialog (which is selected), Options, Webhooks, Disambiguation, Autocorrection, Algorithm Version, Upload / Download, and Content Catalog. The main area displays a tree structure of dialog nodes. Nodes include 'Welcome' (welcome), 'node_1' (#recommend_book), 'node_3' (#recommend_by_author, currently selected), 'node_4' (#ask_popular_books), 'node_6' (#ask_help), 'node_7' (#greeting), and 'node_8' (#goodbye). Each node has a description, response count, context set, and whether it returns a value. To the right of the tree, a panel for 'node_3' is open, showing its configuration. It has a 'List label' column and a 'Value' column, listing eight authors: Agatha Christie, Brandon Sanderson, J.K. Rowling, Dan Brown, George R.R. Martin, Haruki Murakami, Jane Austen, and Margaret Atwood. A 'Customize' button with a gear icon is at the top of this panel. The bottom of the screen shows a taskbar with various icons and system status information.

The screenshot shows the IBM Watson Assistant interface. On the left, a sidebar navigation includes Intents, Entities, My Entities, System Entities, Dialog (selected), Options (Webhooks, Disambiguation, Autocorrection, Algorithm Version, Upload / Download), and Content Catalog. The main workspace displays a dialog tree under the 'Dialog' tab. The tree starts with a root node 'node_1' labeled '#recommend_book'. It branches into 'node_3' labeled '#recommend_by_author', which further branches into five author nodes: 'author1' (@author:(J.K. Rowling)), 'author2' (@author:(Stephen King)), 'author3' (@author:(Margaret Atwood)), 'author4' (@author:(Paulo Coelho) - highlighted with a blue border), and 'author5' (@author:(Haruki Murakami)). Each node has a status bar indicating '1 Responses / 0 Context Set / Does not return'. Above the tree are buttons for 'Add node', 'Add child node', and 'Add folder'. To the right, a configuration panel titled 'If assistant recognizes' contains the condition '@author:(Paulo Coelho)'. Below it, the 'Assistant responds' section includes a 'Text' field with the response 'Here are some Paulo Coelho books you may like:' and an 'Enter response variation' field. A note states 'Response variations are set to sequential. Set to random | multiline' with a 'Learn more' link. Below this is an 'Image' section with fields for 'Title (optional)', 'Description (optional)', 'Image source' (set to 'https://upload.wikimedia.org/wikipedia/commons/'), and 'Alternative text'.

The screenshot shows the IBM Watson Assistant interface. On the left, a sidebar navigation includes Intents, Entities, My Entities, System Entities, Dialog (selected), Options (Webhooks, Disambiguation, Autocorrection, Algorithm Version, Upload / Download), and Content Catalog. The main area displays a dialog tree under the 'Dialog' tab. The tree structure is as follows:

- Add node
- Add child node
- Add folder

- popular book3
@genre:mystery
- popular book4
@genre:fantasy
- popular book5
@genre:thriller
- node_6
#ask_help
- node_7
#greeting
- node_8
#goodbye
- node_9
#express_thanks

The node_6 entry is highlighted with a blue box. To the right, the 'node_6' configuration panel is open, showing the following sections:

- If assistant recognizes:
#ask_help
- Assistant responds:
 - Text:
I can help you find books by genre, author, mood, or popularity. Just tell me what you're looking for!
 - Enter response variation
 - Response variations are set to **sequential**. Set to [random](#) | [multiline](#)
 - [Learn more](#)
- Add response type +
- Then assistant should:
Choose whether you want your Assistant to continue, or wait for the customer to respond.
- Wait for reply

At the bottom, a weather widget indicates "Rainy days ahead 27°C". The taskbar at the bottom includes icons for Search, File Explorer, Python, Word, VSC, Google Chrome, and a shield icon. The status bar shows "11:30 AM 03-08-2025 ENG IN".

The screenshot shows the IBM Watson Assistant Dialog interface. On the left, a sidebar navigation includes Intents, Entities, My Entities, System Entities, Dialog (selected), Options (Webhooks, Disambiguation, Autocorrection, Algorithm Version, Upload / Download), and Content Catalog. The main area displays a hierarchical tree of dialog nodes:

- Add node
- Add child node
- Add folder

- node_7 (highlighted with a blue border):
 - @genre:(science fiction)
 - 1 Responses / 0 Context Set / Return allowed
- popular book3
 - @genre:mystery
 - 1 Responses / 0 Context Set / Return allowed
- popular book4
 - @genre:fantasy
 - 1 Responses / 0 Context Set / Return allowed
- popular book5
 - @genre:thriller
 - 1 Responses / 0 Context Set / Return allowed
- node_6
 - #ask_help
 - 1 Responses / 0 Context Set / Does not return
- node_7
 - #greeting
 - 1 Responses / 0 Context Set / Does not return
- node_8
 - #goodbye
 - 1 Responses / 0 Context Set / Does not return
- node_9
 - #express_thanks
 - 1 Responses / 0 Context Set / Does not return

The right side of the interface shows configuration panels:

- If assistant recognizes:
 - #greeting
 - + (button)
- Assistant responds:
 - Text:

Hello! I can help you find great book recommendations.
Let me know what you're interested in—genre, author, or mood.
 - Enter response variation
 - Response variations are set to **sequential**. Set to [random](#) | [multiline](#)
 - [Learn more](#)
- Add response type +
- Then assistant should:
 - Choose whether you want your Assistant to continue, or wait for the customer to respond.
 - Wait for reply

At the bottom, a weather forecast for Rainy days ahead at 27°C is shown, along with a taskbar with icons for Search, File Explorer, Python, Word, Excel, and others.

The screenshot shows the IBM Watson Assistant Dialog interface. On the left, a sidebar navigation includes Intents, Entities, My Entities, System Entities, **Dialog** (selected), Options, Webhooks, Disambiguation, Autocorrection, Algorithm Version, Upload / Download, and Content Catalog. The main area displays a hierarchical tree of dialog nodes:

- Add node
- Add child node
- Add folder

- popular book4
@genre:fantasy
1 Responses / 0 Context Set / Return allowed
- popular book5
@genre:thriller
1 Responses / 0 Context Set / Return allowed
- node_6
#ask_help
1 Responses / 0 Context Set / Does not return
- node_7
#greeting
1 Responses / 0 Context Set / Does not return
- node_8**
#goodbye
1 Responses / 0 Context Set / Does not return
- node_9
#express_thanks
1 Responses / 0 Context Set / Does not return
- node_11
#recommend_by_mood

The node **node_8** is selected and highlighted with a blue border. To the right, configuration panels are visible:

- If assistant recognizes**: Contains the trigger `#goodbye`.
- Assistant responds**: Contains a text response: "Goodbye! Happy reading!" and an "Enter response variation" field.
- A note states: "Response variations are set to **sequential**. Set to [random](#) | [multiline](#)".
- Add response type** +
- Then assistant should**: Set to "Wait for reply".

At the bottom, a weather widget shows "Rainy days ahead" and "27°C". The system tray shows the date as "03-08-2025" and the time as "11:31 AM".

```
graph TD; node_9["node_9  
#express_thanks"] --> node_11["node_11  
#recommend_by_mood"]
```

The screenshot shows the IBM Watson Assistant Lite interface. On the left, a sidebar lists various options: Intents, Entities, My Entities, System Entities, Dialog (selected), Options, Webhooks, Disambiguation, Autocorrection, Algorithm Version, Upload / Download, and Content Catalog. The main area displays a dialog tree with nodes:

- node_7: #greeting (1 Responses / 0 Context Set / Does not return)
- node_8: #goodbye (1 Responses / 0 Context Set / Does not return)
- node_9: #express_thanks (1 Responses / 0 Context Set / Does not return)
- node_11: #recommend_by_mood (1 Responses / 0 Context Set / Does not return) - This node is selected, highlighted with a blue border.
- node_12: #recommend_by_length (1 Responses / 0 Context Set / Does not return)
- node_2: #recommend_by_genre (1 Responses / 0 Context Set / Does not return)
- Anything else: anything_else (1 Responses / 0 Context Set / Does not return)

At the top, there are buttons for "Add node", "Add child node", and "Add folder". To the right, the "Assistant responds" section is shown, containing a text input field with the placeholder "Text" and a response variation: "Sure! I can help with that. 😊 How are you feeling right now?". Below this, it says "Enter response variation" and "Response variations are set to sequential. Set to random | multiline". A "Learn more" link is provided. At the bottom, there are sections for "Option", "Title", "Description (optional)", "List label", and "Value".

The screenshot shows the IBM Watson Assistant Lite interface. On the left, a sidebar lists navigation options: Intents, Entities, My Entities, System Entities, Dialog (which is selected and highlighted in blue), Options, Webhooks, Disambiguation, Autocorrection, Algorithm Version, Upload / Download, and Content Catalog. The main workspace displays a hierarchical dialog tree. At the top of the tree is a node labeled "funny" with the annotation "@mood:funny". Below it are nodes for "dark" (@mood:dark), "uplifting" (@mood:uplifting), and "sad" (@mood:sad). A new node, "@mood:romantic", has been added and is currently selected, indicated by a blue border around its box. This node has two child nodes: "node_12" with the annotation "#recommend_by_length" and "node_2" with the annotation "#recommend_by_genre". Each node box contains the text "1 Responses / 0 Context Set / Return allowed". To the right of the dialog tree, a detailed configuration panel is open for the "@mood:romantic" node. It includes fields for "Image" (with a placeholder "Enter node name (optional)"), "Title (optional)" (with a placeholder "Add title text"), "Description (optional)" (with a placeholder "Add image description"), "Image source" (containing the URL "https://upload.wikimedia.org/wikipedia/commons/"), "Alternative text" (with a placeholder "Add alternate text for the visually impaired"), and "Text" (containing the text "Pride and Prejudice -- Jane Austen A brilliant story of love, social standing, and witty misunderstandings between Elizabeth Bennet and Mr. Darcy--timeless and cherished ❤️ You can read more about this book here : https://en.wikipedia.org/wiki/Pride_and_Prejudice"). Below this, there is a section for "Response variations" with the note "Response variations are set to sequential. Set to random | multiline" and a "Learn more" link. Another "Image" configuration section is partially visible at the bottom.

The screenshot shows the IBM Watson Assistant Lite interface. On the left, a sidebar lists various options: Intents, Entities, My Entities, System Entities, Dialog (selected), Options, Webhooks, Disambiguation, Autocorrection, Algorithm Version, Upload / Download, and Content Catalog. The main area displays a dialog tree. At the top of the tree is a node labeled "funny" with the sub-mood "@mood:funny". Below it are nodes for "dark" (@mood:dark), "uplifting" (@mood:uplifting), and "sad" (@mood:sad). A node for "@mood:romantic" follows. The next node in the tree is "node_12", which is highlighted with a blue border. This node is associated with the action "#recommend_by_length". The final node shown is "node_2", also associated with "#recommend_by_genre". To the right of the tree, a configuration panel is open for "node_12". It starts with the heading "If assistant recognizes" followed by the action "#recommend_by_length". Below this is the "Assistant responds" section, which contains a "Text" input field with the placeholder "Sure! What kind of book length are you looking for? Short 🟦, Medium 🟩, or Long 🟢?". There is also an "Enter response variation" field and a note about response variations being set to "sequential". At the bottom of the configuration panel, there are sections for "Option", "Title", "Description (optional)", "List label", and "Value". The status bar at the bottom of the screen shows weather information ("Rainy days ahead 27°C"), system icons, and the date/time ("11:31 AM 03-08-2025").
